Reasons for Allowance

1. Claims 1-5 and 11-16 are allowed. The claims will be renumbered as 1-11.
2. The following is an examiner's statement of reasons for allowance: With respect to claim 1, none of the prior art of record disclose or fairly suggest a method of generating a preview of a print pattern on a substantially conical platen surface, among other things, by determining a representative sensor pixel value for pixels in a group of captured radial scan line images; converting a polar coordinate position of the respective group of captured radial scan line images to a position in display window coordinates; plotting the representative sensor pixel values determined in the determining step at corresponding display window coordinates; and displaying the plot of the representative sensor pixel values in a display window as a preview of the captured print pattern image as defined in independent claim 1. Additionally, the prior art of Maase, et al. and Klingensmith, et al. do not disclose or fairly suggest an image conversion system wherein the image conversion system comprises a coordinate conversion module for converting the polar coordinate positions of the captured radial scan line images to positions in rectangular display window coordinates, and a display processing system coupled to the scanning imaging system wherein the display processing system comprises a preview generation module for generating a preview display on the substantially conical platen surface of the captured print image preview display selected by a system user as defined by independent claim 12. It is for these reasons and in combination with all of the other elements of the claims that claims 1-5 and 11-16 are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
